

1. Auth Service

- ✚ Handles user login, registration, JWT tokens, password security, and role management.

2. Platform Management Service

- ✚ Manages faculties, departments, system settings, global configurations, and industry partner account onboarding approvals.

3. Student Profile Service

- ✚ Manages student profiles, GPA/academic records, resume metadata links, and job availability status ("Actively Looking" toggle).

4. Event Management Service

- ✚ Handles creation and scheduling of events, guest speaker profiles, session agendas, and venue allocations.

5. Event Participation Service

- ✚ Manages event registrations, live QR check-ins, student attendance tracking, post-event feedback, and triggers certificate eligibility.

6. Certificate Service

- ✚ Manages uploaded templates, dynamic field mapping, PDF certificate generation, certificate storage, downloads, and QR/public verification.

7. Vacancy Service

- ✚ Handles company job postings, faculty vacancy approvals, vacancy lifecycle, and multi-criteria job search.

8. Application Service

- ✚ Manages job application submissions, real-time application status tracking, candidate shortlisting, and the recruitment pipeline.

9. AI Service

- ✚ Resume-job matching, resume feedback/tips, automated JD and cover letter generation, candidate recommendations, and natural language talent search.

10. Notification Service

- ✚ Handles email delivery, OTPs, automated event reminders, job alerts, and application status push notifications.

11. Audit & Storage Service

- ✚ Handles centralized file storage (resumes, presentation slides, etc) and records immutable system activity audit logs.
